Re: Mighty Argo Upper Landing Wastewater Reclamation Facility Site Application Resubmittal

Dear Ms. Kielty,

The Mighty Argo project has submitted a Site Approval application to the Colorado Department of Public Health and Environment for a wastewater reclamation facility for the upper landing site. In summary, the proposed project involves installing packaged treatment equipment in underground concrete tanks and above-ground containers. The facility will be designed to treat 20,000 gallons per day of sewage and 95 pounds per day of BOD. The wastewater plant will only serve buildings owned by the project; no nearby homes will be connected. The project received site application approval for this project in 2021, but it has expired. There are no substantive changes between the approved site application and this resubmittal.

Upper Clear Creek Watershed Association is being provided with a copy of the Site Application document per CDPHE requirements. It can be downloaded here:
<https://www.dropbox.com/s/kaxwsmsutx2ucil/Mighty%20Argo%20WWTP%20Site%20Application%20Report.pdf?dl=0>

We request you review the application. Comments, if any, can be directed to me and Austin Houser at austin.houser@state.co.us.

Sincerely,
AQUAWORKS DBO, INC.

Adam Sommers, P.E.
